ÖZGÜR
YAYINLARI

2025 Yılı Kaynakçamız

Özgür Yayınları, Üniversitelerarası Kurul Başkanlığı (ÜAK) Doçentlik Başvuru Şartları ve Akademik Teşvik Kritlerlerinde belirtilen tanıma göre "Tanınmış Uluslararası Yayınevi" statüsündedir.

Exploring Scientific Minds in Early Childhood: Environment, Rights, and STEM Integration

Editors:

Prof. Dr. Bahattin Aydınlı

Doç. Dr. Adem Yılmaz

Appendix 1: List of Theses Analyzed in the Study

Abanoz, T. (2020). STEM yaklaşımına uygun fen etkinliklerinin okul öncesi dönem çocuklarının bilimsel süreç becerilerine etkisinin incelenmesi. Dokora Tezi. Gazi Üniversitesi, Eğitim Bilimleri Enstitüsü.

Açıkgöz, S. (2018). Fen eğitiminde okulöncesine yönelik yaklaşımlardan STEM ve Montessori yöntemlerinin öğretmen görüşleri doğrultusunda karşılaştırılması. Unpublished master's thesis). Institute of Science and Technology, Kastomonu University, Kastamonu.

Akçay, B. (2019). STEM etkinliklerinin anaokuluna devam eden 6 yaş çocukların problem çözme becerilerine etkisi. Yayımlanmamış Yüksek lisans tezi.

Yıldız Teknik Üniversitesi, Sosyal Bilimler Enstitüsü, İstanbul Üniversitesi, İstanbul.

Alan, Ü. (2020). Okul öncesi dönem çocuklarına yönelik geliştirilen STEM eğitimi programının etkililiğinin incelenmesi. Doktora Tezi. Hacettepe Üniversitesi, Eğitim Bilimleri Enstitüsü, Ankara

Ata-Aktürk, A. (2019). Okul öncesi eğitimde STEM temelli aile katılımlı bir mühendislik tasarım müfredatının geliştirilmesi. ODTÜ, Ankara.

Atik, A. (2019). STEM etkinliklerinin bilimsel süreç becerileri üzerine etkisi: 5 yaş örneği. Yayımlanmamış Yüksek lisans tezi. Trabzon Üniversitesi, Lisansüstü Eğitim Enstitüsü, Trabzon.

Aydın, T. (2019). STEM uygulamalarının okul öncesi öğrencilerinin bilimsel süreç becerileri ve bilişsel alan gelişimlerine etkisi. (Yayımlanmamış Yüksek Lisans Tezi). Fırat Üniversitesi, Eğitim Bilimleri Enstitüsü, Elazığ.

Bal, E. (2018). FeTeMM (Fen, Teknoloji, Mühendislik, Matematik) etkinliklerinin 48-72 aylık okul öncesi çocuklarının bilimsel süreç ve problem çözme becerileri üzerindeki etkisinin incelenmesi. Eğitim Bilimleri Enstitüsü, Marmara Üniversitesi, İstanbul.

Başaran, M. (2018). Okul öncesi eğitimde STEM yaklaşımının uygulanabilirliği (eylem araştırması) (Yayımlanmamış Doktora Tezi). Gaziantep Üniversitesi, Eğitim Bilimleri Enstitüsü, Gaziantep.

Behram, M. (2019). STEM eğitiminin okul öncesi dönemi öğrencilerinin bilimsel süreç becerilerine etkisinin incelenmesi. Yayımlanmamış yüksek lisans tezi). İstanbul Aydın Üniversitesi Sosyal Bilimler Enstitüsü, İstanbul.

Bulut, N. Ö. (2025). Okul öncesi STEM mesleki gelişim programının öğretmenler, çocuklar ve ailelere yansımaları. Doktora Tezi. Anadolu Üniversitesi, Lisansüstü Eğitim Bilimleri, Eskişehir.

Çakır, Z. (2022). Montessori Yaklaşımı Temelli STEM Etkinliklerinin Öğretmen Adaylarının Fene ve Fen Öğretimine Yönelik Tutumlarına Etkisi. Doktora Tezi. Erzincan Binali Yıldırım Üniversitesi, Fen Bilimleri Enstitüsü, Erzincan.

Çeçen, D. (2023). Okulöncesi öğretmenlerinin STEM eğitimine yönelik farkındalıklarının incelenmesi. Yüksek Lisans Tezi. Dicle Üniversitesi, Eğitim Bilimleri Enstitüsü, Diyarbakır.

Çilengir Gültekin, S. (2019). Okul öncesinde eğitimde drama temelli erken STEM programının bilimsel süreç ve yaratıcı düşünme becerilerine etkisi. Aydın Adnan Menderes Üniversitesi, Sosyal Bilimler Enstitüsü, Aydın.

Çolak, E. (2024). Okul öncesi öğretmenlerinin STEM'e yönelik tutumları ile STEM uygulamalarına yönelik öz yeterlikleri arasındaki ilişkinin incelenmesi. Yüksek Lisans Tezi. Sivas Cumhuriyet Üniversitesi, Eğitim Bilimleri Enstitüsü, Sivas.

Demir, M. A. (2023). STEM yaklaşımı odaklı mobil uygulamaların öğretmen, ebeveyn ve çocuk bakış açısından incelenmesi. Yüksek Lisans Tezi. Kilis 7 Aralık Üniversitesi, Lisansüstü Eğitim Enstitüsü, Kilis.

Demirci, A. (2024). Okul öncesi öğretmenlerinin fen eğitimine yönelik tutumlarının FETEMM farkındalıkları üzerindeki rolünün incelenmesi. Yüksek Lisans Tezi. Sinop Üniversitesi, Lisansüstü Eğitim Enstitüsü, Sinop.

Deniz-Özgök, A. (2019). 60-75 aylık çocukların STEM etkinliklerinde problem çözme ve bilişsel düşünme becerilerinin incelenmesi (Yayınlanmamış Yüksek Lisans Tezi). Bahçeşehir Üniversitesi, Eğitim Bilimleri Enstitüsü, İstanbul.

En, S. (2022). STEM etkinliklerinin erken çocukluk dönemi fen eğitiminde uygulanabilirliğinin çeşitli değişkenler açısından incelenmesi. Yüksek Lisans Tezi. Kastamonu Üniversitesi, Sosyal Bilimler Enstitüsü, Kastamonu.

Erol, A. (2021). STEM öğretmen eğitiminin erken çocukluk öğretmenlerine yansımaları. Doktora Tezi. Pamukkale Üniversitesi, Eğitim Bilimleri Enstitüsü, Denizli.

Güldemir, S. (2019). Okul öncesi eğitiminde STEM etkinliklerinin yaratıcılığa etkisi (Yayınlanmamış yüksek lisans tezi). Recep Tayyip Erdoğan Üniversitesi. Fen Bilimleri Enstitüsü, Rize.

Hatice, G. (2023). Okul Öncesinde 21. Yüzyıl Becerilerine Ulaşmada STEM Yaklaşımı. Doktora Tezi. Ordu Üniversitesi, Fen Bilimleri Enstitüsü, Ordu.

Kale, S. (2019). STEM uygulamalarının okul öncesi öğretmenlerin bilimsel süreç becerilerine etkisinin incelenmesi. Manisa Celal Bayar Üniversitesi, Fen Bilimleri Enstitüsü, Manisa.

Kalyoncu, T. (2021). 60-72 aylık çocukların bilimsel süreç becerilerine STEM-A etkinliklerinin etkisinin incelenmesi. Yüksek Lisans Tezi. Marmara Üniversitesi, Eğitim Bilimleri Enstitüsü, İstanbul

Karamete-Gözcü, Ş. (2019). Okul öncesi öğretmenlerin aldıkları STEM eğitimine ilişkin düşünceleri ve sınıf içi uygulamalarının incelenmesi (Yayımlanmamış Yüksek Lisans Tezi). Kütahya Dumlupınar Üniversitesi, Kütahya.

Kavak, Ş. (2020). STEM eğitimine dayalı etkinliklerin okul öncesi çocukların temel bilimsel süreç becerilerine etkisi. Yayımlanmamış Doktora Tezi. Çukurova Üniversitesi, Adana.

Kesicioğlu, S. (2022). Okul öncesi öğretmen adaylarının STEM eğitimine ilişkin metaforik algıları ve öz yeterlik algılarının incelenmesi. Yüksek Lisans Tezi. İstanbul Bahçeşehir Üniversitesi Lisansüstü Eğitim Enstitüsü, İstanbul.

Mart, Ü. M. (2023). Fen Eğitimi Merkezli FETEMM Etkinliklerinin Erken Çocukluk Döneminde Etkililiği: Vaka Çalışması. Yüksek Lisans Tezi. Necmettin Erbakan Üniversitesi, Eğitim Bilimleri Enstitüsü, Konya

"Memiş, B. (2024). Erken STEM eğitiminin 60 72 aylık çocukların bilimsel süreç becerilerine ve sosyal becerilerine etkisinin incelenmesi. Yüksek Lisans Tezi. Bahçeşehir Üniversitesi, Lisansüstü Eğitim Bilimleri, İstanbul.

Nişan, M. (2024). Okul öncesi STEM eğitim programının çocukların üstbilişsel becerilerine etkisi. Doktora Tezi. Gazi Üniversitesi, Eğitim Bilimleri Enstitüsü, Ankara.

Öcal, S. (2018). Okul öncesi eğitime devam eden 60-66 ay çocuklarına yönelik geliştirilen STEM programının çocukların bilimsel süreç becerilerine etkisinin incelenmesi. Yıldız Teknik Üniversitesi, Sosyal Bilimler Enstitüsü, İstanbul.

Okatan, Ö. (2024). Okul öncesi dönemde artırılmış gerçeklik destekli STEAM etkinliklerinin çocukların bilim öğrenmelerine etkisi: Karma yöntem. Doktora Tezi. Burdur Mehmet Akif Ersoy Üniversitesi Eğitim Bilimleri Enstitüsü, Burdur.

Özcan Döğücü, T. (2024). Okul Öncesi Öğretmenlerinin STEM Eğitimine Yönelik Uygulamalarının ve Görüşlerinin İncelenmesi. Yüksek Lisans Tezi. Ordu Üniversitesi, Sosyal Bilimler Enstitüsü, Ordu.

Öztürk, Z.D. (2020). STEM etkinliklerinin okul öncesi öğrencilerin problem çözme becerisine. Yüksek Lisans Tezi. Recep Tayyip Erdoğan Üniversitesi, Sosyal Bilimler Enstitüsü.

Ramazan, S. (2021). Okul öncesi öğretmenlerinin erken çocuklukta STEM yaklaşımına yönelik görüşleri (uygulamalı bir çalışma). Yüksek Lisans Tezi. Kırklareli Üniversitesi, Sağlık Bilimleri Enstitüsü, Kırklareli.

Rusçuklu, P. (2023). Yaşam temelli STEAM etkinliklerinin okul öncesi dönem altı yaş grubu çocuklarının yaratıcı düşünme becerisi üzerine etkisi. Doktora Tezi. Bursa Uludağ Üniversitesi, Eğitim Bilimleri Enstitüsü, Bursa.

Sağbaş, A. (2019). STEM odaklı olarak yeniden tasarlanan okul öncesi öğretmenliği bölümü fen ve matematik eğitimi dersinin uygulanma süreci: bir durum çalışması. Bahçeşehir Üniversitesi, İstanbul.

Şahiner, D. (2022). Okul öncesi eğitimde STEAM eğitim yaklaşımından esinlenerek 5E öğrenme modeli ile fen uygulamaları: Bir eylem araştırması. Yüksek Lisans Tezi. Anadolu University, Eğitim Bilimleri Enstitüsü, Eskişehir.

Şamlı, H. Ö. (2025). STEM temelli matematik eğitim programının okul öncesi dönem çocuklarının matematik ve bilimsel süreç becerilerine etkisinin incelenmesi. Doktora tezi. Gazi üniversitesi, Eğitim Bilimleri Enstitüsü, Ankara.

Samur, E. (2022). Montessori yaklaşımı temelli STEM etkinliklerinin okul öncesi öğrencilerinin akademik benlik saygıları üzerine etkisi. Yüksek Lisans Tezi. Erzincan Binali Yıldırım Üniversitesi, Fen Bilimleri Enstitüsü, Erzincan

Şanlı, Z. S. (2021). Erken çocukluk döneminde STEM etkinliklerinin 60-72 aylık çocukların yaratıcı düşünme ve problem çözme becerilerine etkisi. Doktora Tezi. Hacettepe Üniversitesi, Eğitim Bilimleri Enstitüsü, Ankara

Sarı, N. (2023). STEM etkinlikleri ile desteklenen okul öncesi eğitim programının çocukların 21. yüzyıl becerilerine etkisinin incelenmesi. Yüksek Lisans Tezi. Sivas Cumhuriyet Üniversitesi, Eğitim Bilimleri Enstitüsü, Sivas.

Savaş, E. (2024). Erken çocukluk döneminde STEM etkinliklerinin çocukların bilimsel süreç becerilerine ve eleştirel düşünme becerilerine etkisinin incelenmesi. Yüksek lisans tezi. İstanbul Aydın Üniversitesi Lisansüstü Eğitim Bilimleri, İstanbul.

Savaş, Ö. (2021). Erken çocukluk döneminde bulunan çocuklara yönelik geliştirilen STEM eğitim uygulamalarının bilimsel süreç becerilerine etkisinin incelenmesi. Yüksek Lisans Tezi. Uşak Üniversitesi, Lisansüstü Eğitim Enstitüsü, Uşak.

Seleş, Ş. (2024). STEM Eğitiminin Okul Öncesi Eğitime Devam Eden 5 yaş Grubu Çocuklarin Sosyal Becerilerine Etkisinin Incelenmesi. Yüksek Lisans Tezi. Necmettin Erbakan Universitesi, Eğitim Bilimleri Enstitüsü, Konya.

Şimşek, V. (2022). STEM eğitimi uygulamalarının okul öncesi dönemde yaratıcılık ve eleştirel düşünme becerilerine etkisi. Yüksek Lisans Tezi. Alanya Alaaddin Keykubat Üniversitesi, Lisansüstü Eğitim Enstitüsü, Alanya.

Tepe, B. (2023). Yaratıcı drama yöntemine dayalı STEM temelli çevre eğitim programının 60-72 aylık çocukların bilimsel süreç becerilerine ve çevresel farkındalık düzeylerine etkisi. Doktora tezi. Ordu Üniversitesi, Fen Bilimleri Enstitüsü, Ordu.

Tüfekçi, C. (2024). Okul öncesi öğretmenlerinin STEM temelli afet eğitimi uygulamalarına yönelik görüş ve deneyimleri. Yüksek Lisans Tezi. Eskişehir Osmangazi Üniversitesi, Eğitim Bilimleri Enstitüsü, Eskişehir.

Turan, S. (2025). Okul öncesi eğitim kurumlarının STEM+A etkinliklerine uygunluğunun incelenmesi. Yüksek Lisans Tezi. Gazi Üniversitesi, Eğitim Bilimleri Enstitüsü, Ankara.

Ünal, M. (2019). 4-6 yaş okul öncesi çocuklarına etkinlik temelli STEM eğitiminin bilimsel süreç becerilerine etkisinin incelenmesi. Bolu Abant İzzet Baysal Üniversitesi, Eğitim Bilimleri Enstitüsü, Bolu.

Ünlü, A. B. (2021). Okul öncesi eğitim kurumuna devam eden 5 yaş grubu çocuklara uygulanan STEM eğitim programının ekolojik ayak izi farkındalığına etkisi. Yüksek Lisans Tezi. Aksaray Üniversitesi, Sosyal Bilimler Enstitüsü, Aksaray.

Üret, A. (2019). STEM eğitiminin anaokuluna devam eden 5 yaş çocuklarının yaratıcılık düzeylerine etkisi. Yüksek Lisans Tezi. Yıldız Teknik Üniversitesi, Sosyal Bilimler Enstitüsü, İstanbul.

Uyulan, V. (2024). Erken çocukluk döneminde STEM etkinlikleri ile öğrencilerin bilimsel süreç becerilerinin ve eleştirel düşünme becerilerinin geliştirilmesi. Yüksek Lisans Tezi. Süleyman Demirel Üniversitesi, Eğitim Bilimleri Enstitüsü, Isparta.

Yaşar, Z. (2021). Okul Öncesi Öğretmenlerinin FETEMM Farkındalık Düzeylerine ve FETEMM Etkinliklerine İlişkin Görüşleri. Yüksek Lisans Tezi. Fırat Üniversitesi Eğitim Bilimleri Enstitüsü, Elazığ.

Yazıcı, Z. Ü. (2021). STEM Eğitimi Alan ve Almayan Okul Öncesi Öğretmenlerinin 21. Yüzyıl Becerilerinin Öğretimine İlişkin Öz Yeterlik Algılarının İncelenmesi. Yüksek Lisans Tezi. Üsküdar Üniversitesi, Sağlık Bilimleri Enstitüsü, İstanbul.

Yıldırım, Z. (2021). Montessori eğitimine devam eden 60-72 aylık çocuklar için geliştirilmiş m-STEM programının çocukların bilimsel süreç becerilerine etkisinin incelenmesi. Yayımlanmamış yüksek lisans tezi. Yıldız Teknik Üniversitesi, Sosyal Bilimler Enstitüsü, İstanbul.

Yıldız, B. (2024). STEM eğitiminin okul öncesi eğitime devam eden 5 yaş grubu çocukların iletişim becerileri üzerindeki etkisi. Yüksek Lisans Tezi. Necmettin Erbakan Üniversitesi, Eğitim Bilimleri Enstitüsü, Konya.

Yıldız, S. (2023). Okul Öncesi Öğrencilerine Yönelik Web 2.0 Araçlarıyla Zenginleştirilmiş STEAM Etkinliklerinin Geliştirilmesi ve Etkisinin Değerlendirilmesi. Doktora tezi. Fırat Üniversitesi, Eğitim Bilimleri Enstitüsü, Elazığ

Yılmaz, G. (2023). Okul öncesi eğitimde STEM yaklaşımının kullanımı: Oyun temelli mühendislik tasarım uygulamaları. Doktora Tezi. Bursa Uludağ Üniversitesi, Eğitim Bilimleri Enstitüsü, Bursa.

Chapter 5

XR Applications in Healthcare Education Serious Games

Mustafa Kuş[1]

Abstract

This chapter presents a comprehensive analysis of contemporary XR-based serious game implementations in healthcare education from 2020 to 2025. The selected case studies represent commercially available and academically validated applications that demonstrate the successful integration of game mechanics with educational objectives across multiple healthcare domains.

The analysis encompasses 16 applications organized across six areas of healthcare education: medical education, nursing education, dental education, nutrition education, and physiotherapy education. Each section features Virtual Reality (VR), Augmented Reality (AR), and Mixed Reality (MR) examples, where available, providing diverse technological approaches to integrating serious games.

Introduction

This chapter presents a comprehensive analysis of contemporary XR-based serious games implementations in healthcare education from 2020-2025. The selected case studies represent commercially available and academically validated applications that demonstrate successful integration of game mechanics with educational objectives in healthcare contexts. Each application is evaluated through the lens of serious games design principles, examining how game elements enhance learning outcomes while maintaining educational rigor.

The case studies are organized by healthcare education domains, with each section featuring at least two VR examples, two AR examples, and Mixed Reality (MR) applications where available. These real-world

1 MEng, Kocaeli Health and Technology University, mustafakus0276@gmail.com, ORCID ID: https://orcid.org/0009-0001-1306-8683

https://doi.org/10.58830/ozgur.pub753.c3087

implementations provide practical insights for educators, game designers, and administrators considering the development or adoption of XR-based serious games in their institutions. All featured applications have been validated through peer-reviewed research and demonstrate measurable educational outcomes in healthcare settings.

The analysis framework evaluates each case study across four critical dimensions: serious games design elements, pedagogical effectiveness, technological implementation, and scalability potential. This systematic approach enables readers to understand not only what makes these applications successful but also how serious games principles can be effectively integrated into XR healthcare education environments.

1.1 Medical Education Serious Games

1.1.1. 3D Organon

Application Overview:

- **Primary Use:** Gamified anatomical exploration and medical knowledge assessment
- **Target Population:** Medical, nursing, physiotherapy students
- **Technology Stack:** Multi-platform VR (Meta Quest, HTC Vive, PC VR)

Serious Games Design Elements:

- **Progressive Unlocking System:** Students unlock anatomical systems through knowledge demonstrations
- **Challenge-Based Learning:** Quiz modes with time pressure and scoring mechanics
- **Virtual Dissection Games:** Interactive layer-by-layer exploration with achievement systems
- **Collaborative Competition:** Multi-user challenges in shared virtual anatomy labs
- **Performance Analytics:** Real-time scoring and progress tracking across learning modules

Game Mechanics Integration: The platform integrates gaming elements with traditional anatomy education to enhance student engagement:

- **Achievement Badges:** Students earn credentials for mastering different body systems

- **Leaderboard Systems:** Comparative performance tracking motivates continued engagement
- **Exploration Rewards:** Discovery-based learning with hidden anatomical features
- **Mission-Based Structure:** Structured learning paths with clear objectives and goals

Research Evidence: A technology acceptance study involving n=17 medical and neuroscience students evaluated 3D Organon for eye and ear anatomy learning. Students highly accepted the platform, with enjoyment being the highest rated factor (μ = 1.9) and perceived ease of use strongly predicting behavioral intention (β = 1.01). The study's small sample size suggests need for larger-scale validation studies (Alturkustani et al.,2025).

Website: https://www.3dorganon.com/

1.1.2. Osso VR (Surgical Training Serious Games)

Application Overview:

- **Primary Use:** Gamified surgical procedure training with assessment mechanics
- **Target Population:** Medical students, surgical residents, practicing surgeons
- **Technology Stack:** VR headsets with haptic feedback and performance analytics

Serious Games Design Elements:

- **Skill Trees:** Progressive surgical competency development through game-like advancement
- **Scenario Challenges:** Time-based surgical missions with scoring systems
- **Multiplayer Training:** Team-based surgical scenarios with role-playing elements
- **Failure Mechanics:** Risk-reduced practice environment with scenario repetition options
- **Certification Games:** Competency-based advancement through surgical skill challenges

Game Mechanics Integration:

- **Performance Scoring:** Performance tracking systems that have shown improvement metrics in controlled studies
- **Procedural Mastery:** Level-based progression through increasingly complex surgical scenarios
- **Social Learning:** Peer comparison and collaborative learning environments
- **Immediate Feedback:** Game-like response systems for technical skill development

Research Evidence: A randomized controlled pilot study with n=20 medical students and residents examined VR training effectiveness for SCFE procedures. VR-trained participants demonstrated 19% shorter completion times and 70% fewer repositioning attempts, with significant angular accuracy improvements. As a pilot study, findings require validation in larger, multi-institutional trials (Cevallos et al., 2022).

Website: https://www.ossovr.com

1.1.3. MERGE Cube Medical Education (AR/VR Serious Games Platform)

Application Overview:

- **Primary Use:** Gamified organ system exploration through handheld AR interactions
- **Target Population:** Medical students, K-12 health education
- **Technology Stack:** Mobile AR with physical cube manipulatives

Serious Games Design Elements:

- **Physical-Digital Interaction:** Cube manipulation mechanics for organ system exploration
- **Collection Games:** Students "collect" anatomical knowledge through AR discoveries
- **Puzzle Challenges:** Assembling organ systems through AR-guided game mechanics
- **Knowledge Quests:** Structured learning adventures with clear progression paths

- **Achievement Systems:** Unlockable content based on learning milestones

Game Mechanics Integration: The platform gamifies medical education through:

- **Exploration Rewards:** Hidden anatomical features revealed through cube manipulation
- **Progressive Complexity:** Layered learning with increasing challenge levels
- **Social Sharing:** Platform includes features for knowledge sharing and peer interaction
- **Immediate Validation:** Real-time feedback on anatomical identification and understanding

Research Evidence: Mobile-based AR using MERGE Cube technology demonstrated effectiveness equivalent to peer teaching programs in anatomy education, with significant improvement in test scores for AR intervention groups. The study confirmed AR's potential to simulate hands-on laboratory time and provide effective 3D realistic anatomic imaging that engages visuospatial skills while being accessible remotely (Uribe et al., 2023).

Web sites: https://mergeedu.com/cube

1.1.4. HoloAnatomy MR (Microsoft HoloLens)

Application Overview:

- **Primary Use:** Holographic anatomy education with serious games elements
- **Target Population:** Medical students, surgical training programs
- **Technology Stack:** Microsoft HoloLens with spatial computing capabilities

Serious Games Design Elements:

- **Holographic Puzzles:** Students solve anatomical challenges in shared physical spaces
- **Collaborative Quests:** Team-based learning missions with role assignments
- **Spatial Challenges:** 3D problem-solving games requiring anatomical knowledge

- **Performance Competitions:** Group challenges in holographic anatomy exploration
- **Achievement Unlocking:** Progressive content access through demonstrated competency

Game Mechanics Integration:

- **Environmental Gaming:** Physical learning spaces are integrated with virtual content
- **Collaborative Mechanics:** Multiple students interact with shared holographic content
- **Spatial Problem-Solving:** 3D anatomical puzzles requiring team coordination
- **Real-Time Assessment:** Assessment features integrated within interactive scenarios

Research Evidence: The study developed an instructional model using HoloLens mixed-reality technology that targeted behavioral, emotional, and cognitive dimensions of student engagement through team-based learning (TBL) and case-based learning (CBL). Student engagement was assessed through observed behavioral indicators, demonstrating the effectiveness of this immersive technology in delivering human gross anatomy laboratory sessions to first-year osteopathic medical students (Richards, 2023).

Website: https://www.alensiaxr.com

1.2 Nursing Education Serious Games

1.2.1 UbiSim VR

Application Overview:

- **Primary Use:** Gamified nursing simulation through immersive VR scenarios
- **Target Population:** Nursing students, continuing education programs
- **Technology Stack:** Advanced VR headsets with motion tracking and scenario customization
- **Implementation Challenges:** Platform adoption requires careful curriculum integration and faculty training

- **Student Adaptation Variability:** Learning outcomes vary based on individual student technology comfort levels

Serious Games Design Elements:

- **Scenario-Based Missions:** Clinical challenges with clear objectives and success criteria
- **Multi-User Collaborative Gameplay:** Team-based patient care scenarios requiring coordination
- **Performance Scoring Systems:** Real-time evaluation of nursing interventions and decisions
- **Achievement Progression:** Competency-based advancement through clinical skill levels
- **Customizable Patient Scenarios:** Educator-controlled difficulty and complexity adaptation
- **Mixed-Modality Integration**: Combines VR simulation with traditional methods to address varied learning preferences
- **Technology Adaptation Support:** Built-in tutorials and progressive exposure to reduce technology-related anxiety

Game Mechanics Integration:

- **Immersive Patient Encounters:** VR simulation aims to provide realistic clinical scenarios for learning
- **Collaborative Team Mechanics:** Multiple nurses work together in shared virtual environments
- **Intuitive Scenario Editor:** No-code authoring tool enables custom challenge creation
- **Progress Analytics:** Performance monitoring tools designed to assess clinical reasoning progress
- **Safe Failure Environment:** Risk-free practice with immediate scenario restart capabilities

Research Evidence: The HRSA-funded study provided student nurses with supplemental virtual reality simulation experiences through UbiSim® as part of the nursing program curriculum. Virtual reality simulation received mixed evaluations among student nurses, with benefits including enhanced engagement and immersive learning experiences, while concerns centered on technology adaptation challenges and the need for comprehensive faculty

support during implementation. The study emphasizes the importance of strategic integration rather than wholesale replacement of traditional simulation methods (Thrift et al., 2025).

Website: https://www.ubisimvr.com

1.2.2. Oxford Medical Simulation

Application Overview:

- **Primary Use:** Gamified emergency nursing scenarios with crisis management
- **Target Population:** Emergency nursing programs, continuing education
- **Technology Stack:** VR headsets with physiological patient modeling

Serious Games Design Elements:

- **Crisis Management Games:** High-pressure scenarios with time constraints and scoring
- **Team Coordination Challenges:** Multi-user nursing scenarios requiring collaboration
- **Protocol Mastery:** Game-based learning of emergency nursing procedures
- **Patient Safety Missions:** Scenarios focused on preventing medical errors through gaming
- **Competency Competitions:** Skill-based challenges with peer comparison

Game Mechanics Integration:

- **Stress Simulation:** Simulation incorporates time-pressure elements designed to approximate clinical urgency
- **Performance Metrics:** Real-time scoring of nursing interventions and decisions
- **Failure Learning:** Scenario repetition capabilities allow multiple practice attempts
- **Progressive Difficulty:** Emergency scenarios increase in complexity through gameplay

Research Evidence: Multiple institutional case studies demonstrate significant efficiency gains, with one implementation showing a 2,000-session

reduction in staffing time and estate costs, resulting in a 74% decrease. At the same time, learners completed 12,800 scenarios in one month, equivalent to 380 days of simulation. Educational institutions report that students are highly engaged and immersed in VR scenarios, with Nightingale College running over 20,000 scenarios per semester and students feeling more prepared for real-life emergencies.

Website: https://oxfordmedicalsimulation.com

1.2.3. WEFI Games VR Platform

Application Overview:

- **Primary Use:** Gamified nursing care training for hyperglycemia management through immersive VR scenarios
- **Target Population:** Graduate nursing students, clinical nurses pursuing advanced education, internal medicine nursing programs
- **Technology Stack:** Oculus Quest VR headsets with Unity 2020.3.3f1 engine, head movement navigation without hand controllers

Serious Games Design Elements:

- **Immersive Patient Scenarios:** Students navigate virtual hospital environments with realistic patient encounters requiring hyperglycemia management decisions
- **Avatar-Based Learning:** Generation Z-friendly visual design with avatar-style characters and vibrant hospital environments that differ from traditional clinical settings
- **Achievement-Based Progression:** The badge system rewards successful completion of nursing care scenarios with "TEBRIKLER" (congratulations) feedback
- **Multi-Modal Information Delivery:** Continuous flow of visual and auditory information maintains student engagement in game scenarios
- **Safe Practice Environment:** Risk-free virtual space enables repeated practice of high-stakes nursing interventions without patient safety concerns

Game Mechanics Integration:

- **Experiential Learning Gameplay:** Students apply theoretical nursing knowledge directly to virtual patient care scenarios, enhancing knowledge retention through practical application
- **Head-Movement Navigation:** Simplified interaction design eliminates controller complexity, focusing attention on clinical decision-making rather than technical manipulation
- **Real-Time Performance Feedback:** Immediate visual and auditory responses to nursing interventions provide continuous learning reinforcement
- **Scenario-Based Challenges:** Structured patient care missions with clear objectives and success criteria for hyperglycemia management
- **Adaptive Learning Paths:** The platform accommodates different experience levels, from graduate students to practicing nurses

Research Evidence: A qualitative study involving 13 graduate nursing students (77% female, 23% male) reveals positive learning experiences, with 92.3% of participants having no prior experience with smart glasses. Thematic analysis reveals five key themes: emotional engagement, positive learning experiences, accessibility of technology, future clinical applications, and design feedback. Students report enhanced knowledge retention, immersive learning environments, and strong potential for clinical skill development (Calik, Ozkul and Kapucu, 2024).

Educational Impact: Participants emphasize smart glasses as "immersive" and "interesting" learning tools that make nursing education more memorable than traditional teaching methods. Students report that applying theoretical knowledge in virtual patient scenarios increases knowledge permanence, with continuous information flow maintaining engagement throughout learning sessions.

Websites: http://wefigames.com

1.2.4. vrClinicals for Nursing (Advanced VR Clinical Training)

Application Overview:

- **Primary Use:** Multi-patient VR simulation with conversational AI and complex care scenarios
- **Target Population:** Advanced nursing students, NCLEX preparation programs

- **Technology Stack:** Advanced VR systems with conversational AI integration

Serious Games Design Elements:

- **Multi-Patient Management Games:** Complex priority-setting challenges with scoring systems
- **Conversational AI Interactions:** Natural language patient communication with performance evaluation
- **Real-Time Decision Pressure:** Time-constrained scenarios requiring quick clinical judgment
- **Interruption and Event Management:** Dynamic scenarios with changing patient conditions
- **Next Generation NCLEX Preparation:** Gaming mechanics aligned with updated nursing assessment standards

Game Mechanics Integration:

- **Priority Management Challenges:** Students must reprioritize care based on evolving patient data
- **Delegation Gaming:** Team-based scenarios requiring effective task distribution
- **Communication Skill Building:** AI-powered patient interactions with feedback on therapeutic communication
- **Clinical Judgment Advancement:** Progressive scenarios building from vSim single-patient foundation
- **Performance Analytics:** Comprehensive tracking of decision-making patterns and outcomes

Website: https://www.wolterskluwer.com/en/solutions/lippincott-nursing-faculty/vrclinicals-for-nursing

1.3 Dental Education Serious Games

1.3.1. Virteasy Dental VR (Haptic-Enhanced Dental Training Platform)

Application Overview:

- **Primary Use:** Gamified dental procedure training with haptic feedback integration

- **Target Population:** Dental students, practicing dentists, dental education programs
- **Technology Stack:** VR headsets with advanced haptic arms, 3D mouse navigation, RFID card readers

Serious Games Design Elements:

- **Progressive Skill Trees:** Students advance through increasingly complex dental procedures with achievement unlocking
- **Haptic Challenge Scenarios:** Haptic drilling simulations programmed to provide variable resistance feedback
- **Performance-Based Advancement:** Competency gates require a demonstration of technical proficiency before accessing advanced modules
- **Multi-Tool Mastery Games:** Interactive scenarios requiring proper instrument selection and manipulation techniques
- **Real-Time Assessment Challenges:** Immediate scoring and feedback on precision, technique, and procedural accuracy
- **Adaptive Complexity Management:** Platform adjusts immersion levels based on task complexity and student competency
- **Hybrid Training Approach:** Combines traditional haptic simulation with selective VR integration for optimal learning outcomes
- **Performance-Based VR Integration**: VR immersion activated progressively as students master fundamental skills

Game Mechanics Integration:

- **Tactile Feedback Systems:** The haptic arm allows for realistic manipulation of the various tools, offering the possibility to feel the different resistances to contact with the tooth components
- **Selective Immersion Scenarios:** Platform provides controlled immersion levels, balancing virtual environment benefits with task performance optimization for complex procedures
- **Customizable Learning Paths:** Virteasy Editor is a powerful tool for importing patient scans, defining caries, and fully controlling your specific cases to take learning to the next level
- **Achievement-Based Progression:** Students receive feedback recognition upon completing body system modules

- **Social Learning Elements:** Multi-user scenarios enabling collaborative dental procedure practice

Research Evidence: Research findings present mixed results for full VR immersion in dental training. While haptic simulation shows promise for skill development, the study revealed that combining VirTeaSy Dental® simulator with VR headsets resulted in decreased performance in complex access cavity preparation tasks. However, the platform's haptic feedback capabilities remain valuable for foundational skill building and procedural understanding (Bandiaky et al., 2025).

Website: https://virteasy.com/

1.3.2. Dental VR Academy (Nursing Skills Virtual Reality Platform)

Application Overview:

- **Primary Use:** Comprehensive dental nursing training through immersive VR simulations
- **Target Population:** Dental nursing students, dental assistant training programs
- **Technology Stack:** VR headset and comes with the Dental VR Academy app pre-installed and ready to go

Serious Games Design Elements:

- **Clinical Scenario Challenges:** Students can infinitely practice and hone their skills without the practical limitations of classroom training, performing the same processes that they are expected to be able to perform in the real world
- **Competency-Based Progression:** Training modes followed by assessment evaluations
- **Performance Tracking Systems:** Assessment mode, which teachers can then review in the Assessment Centre - an easy-to-use web-based tool that is included
- **Real-World Procedure Simulation:** Authentic dental clinic environments with accurate instrumentation
- **Achievement-Based Learning:** Progressive unlocking of advanced dental nursing procedures

Game Mechanics Integration:

- **Risk-Free Practice Environment:** Students practice complex procedures without patient safety concerns
- **Immediate Assessment Feedback:** Real-time evaluation of dental nursing competencies
- **Expandable Content Modules:** choosing from an expanding selection of training modules
- **Self-Paced Learning Progression:** Students advance through modules based on demonstrated competency

Website: https://www.dentalvr.academy/

1.3.3. Simodont Dental Trainer (Haptic VR Dental Education Platform)

Application Overview:

- **Primary Use:** Gamified dental procedure training with advanced haptic feedback and AI integration
- **Target Population:** Dental students, preclinical education, continuing dental education
- **Technology Stack:** VR headsets with sophisticated haptic technology, AI-trained algorithm for DICOM file conversion

Serious Games Design Elements:

- **Progressive Skill Building:** Research shows that skills learned on Simodont are carried over into the real world, improving performance
- **Patient-Specific Training 2.0:** CBCT or micro-CT scans (.DICOM files) can be easily converted into Simodont compatible models with AI-trained algorithm
- **Comprehensive Assessment Modes:** Simodont has been used for preclinical assessment in cavity preparation and tooth preparation with progress traced, recorded, and scored
- **Unlimited Learning Opportunities:** Device not only simulates the clinical scenario but also provides the unlimited learning opportunity without material consumption
- **Real-World Transfer Validation:** proven skill transfer from Simodont into the physical world, for example by training on virtual reality manual dexterity blocks

Game Mechanics Integration:

- **Realistic Haptic Feedback:** Mimics the touch sensations of clinical drilling procedures such as caries removal, tooth preparation, and pulp chamber opening through sensory feedback
- **Custom Curriculum Development:** Curriculum integration support: platform designed to complement existing dental education curricula
- **Life-like Clinical Experience:** Haptic feedback system designed to simulate handpiece manipulation
- **Evidence-Based Performance Tracking:** Tracking drill time and net score for repeated manual dexterity exercises showing evidence that practicing hand skills improves performance
- **Early Clinical Exposure:** first year students able to practice indirect vision earlier than ever in de curriculum

Research Evidence: A randomized controlled trial involving 40 dental students demonstrated that skill development in students trained using Simodont was comparable to that in students using artificial teeth, with no statistically significant difference in improvement rates (23% vs. 39%, p = .315). The study concluded that Simodont was acceptable to students and its use as an adjunct to artificial teeth in endodontic access cavity training is reasonable (Slaczka et al., 2024).

Website: https://www.simodontdentaltrainer.com/

1.4. Nutrition Education

1.4.1. IVAN VR (Immersive Virtual Alimentation)

Application Overview:

- **Primary Use:** Immersive Virtual Alimentation and Nutrition (IVAN) application designed to educate users about food-energy density and portion size control
- **Target Population:** Nutrition students, public health education programs, patient education
- **Technology Stack:** Interactive VR environments with food manipulation capabilities

Serious Games Design Elements:

- **Knowledge Construction Games:** Users actively construct knowledge about energy density by manipulating virtual food items and exploring the concept of portion size control through hypothesis testing and assembling virtual meals in iVR
- **Hypothesis Testing Challenges:** Students experiment with meal combinations to understand nutritional balance
- **Interactive Food Manipulation:** Hands-on learning through virtual food item assembly and analysis
- **Portion Control Missions:** Progressive scenarios teaching appropriate serving sizes
- **Nutritional Discovery Quests:** Guided exploration of food energy density concepts

Game Mechanics Integration:

- **Experimental Learning Mechanics:** Students test nutritional hypotheses through virtual meal creation
- **Interactive learning pathways:** Platform supports knowledge building through virtual food manipulation activities
- **Immediate Nutritional Feedback:** Real-time analysis of meal composition and energy content
- **Remote Learning Capabilities:** Remote study using the Immersive Virtual Alimentation and Nutrition (IVAN) application

Website: https://www.psu.edu/news/research/story/digital-dietician-developed-penn-state-may-help-people-make-better-choices

1.4.2. Foodbot Factory (Mobile Serious Game)

Application Overview:

- **Primary Use:** Mobile educational gaming platform designed to enhance elementary students' understanding of nutritional guidelines through Canada's Food Guide
- **Target Population:** Elementary learners aged 8-10 years, primary school health curriculum, standards-aligned education
- **Technology Stack:** Smartphone-based educational game featuring behavioral modification techniques and interactive gaming elements

Serious Games Design Elements:

- **Structured Educational Components:** Educational framework encompasses five nutritional categories: beverages, produce items, grain-based foods, animal-derived proteins, and plant-based protein sources
- **Character-Driven Learning Experiences:** Educational platform features scientific characters and robotic assistants that facilitate entertaining conversations and educational mini-challenges
- **Systematic Learning Progression:** Educational design incorporates 19 distinct learning goals, combining 13 established objectives with six newly developed competency targets
- **Practical Application Scenarios:** Narrative elements integrate nutritional wellness concepts that correspond with established educational outcomes

Game Mechanics Integration:

- **Engagement-Focused Mini-Challenges:** Educational activities feature narrative-driven challenges that reinforce nutritional wellness principles through established learning frameworks
- **Student-Focused Development Methodology:** Cyclical design process exemplifies strategies for enhancing learner participation, satisfaction, and platform accessibility
- **Evidence-Based Assessment Tools:** Nutritional understanding evaluation instrument specifically created for Canada's dietary guideline measurement
- **Educational Implementation Framework:** Standards-aligned instructional materials created to assist educators and students aged 8-12 in nutritional learning

Research Evidence: Multiple research investigations indicate that Foodbot Factory demonstrates significant promise as an educational platform for enhancing children's nutritional understanding.

Website: https://arcandnutritionlab.com/foodbot-factory/

1.5. Physiotherapy Education

1.5.1. PhysioLearn VR (Anatomy Education Platform)

Application Overview:

- **Primary Use:** Three-dimensional virtual reality learning environment designed for comprehending sophisticated anatomical structures within physiotherapy curricula
- **Target Population:** Healthcare students, physical therapy learners, medical educators and academic professionals
- **Technology Stack:** Open-access virtual reality educational system incorporating advanced VR and tactile feedback Technologies

Serious Games Design Elements:

- **Three-Dimensional Learning Exploration:** Open-access virtual reality educational system created for healthcare students, instructors, and academic practitioners
- **Tactile Learning Implementation:** Constructed using cutting-edge VR and haptic feedback systems, delivering experiential educational opportunities
- **Academic-Clinical Connection:** An educational platform connects theoretical understanding with hands-on competencies in anatomical comprehension
- **Virtual Anatomical Investigation:** Learners examine human physiological systems through unprecedented immersive digital environments
- **Multi-User Educational Spaces:** Platform capabilities support shared anatomical investigation and collaborative academic discussions

Game Mechanics Integration:

- **Interactive Anatomical Investigation:** Three-dimensional learning spaces convert conventional anatomy instruction into compelling exploratory experiences
- **Structured Competency Advancement:** The educational system provides organized learning sequences from fundamental anatomical concepts to advanced clinical implementations
- **Milestone-Based Progression:** Students progress through escalating anatomical complexity and physiological system understanding

- **Immediate Learning Assessment:** Instant evaluation of anatomical comprehension and three-dimensional spatial reasoning
- **Personalized Educational Sequences:** Dynamic content presentation responding to individual learning requirements and academic advancement

Website: https://physiolearn.netlify.app/

1.5.2. Clinical Pattern Recognition

Application Overview:

- **Primary Use:** Evidence-based simulations and interactive gamified content for physiotherapy clinical decision-making training
- **Target Population:** Physiotherapy students, clinical education programs, professional development
- **Technology Stack:** Interactive simulations, 3D anatomical models, case-based scenarios, and gamified learning modules

Serious Games Design Elements:

- **Clinical Reasoning Simulations:** The platform employs research-backed simulation scenarios that enhance student participation while facilitating knowledge synthesis and practical application
- **Neurological System Gamification:** Learning modules incorporate game-based elements to support a comprehensive understanding of neurological concepts and processes
- **Structured Competency Development:** Educational framework features incrementally advancing challenges that establish robust neuroanatomical foundations for clinical applications
- **Scenario-Based Learning Modules:** Patient-centered educational tools enable students to apply theoretical concepts within realistic clinical contexts
- **Integrated Evaluation Systems:** Multimedia assessment platform encompasses neurologic examination components with interactive testing functionalities

Game Mechanics Integration:

- **Interactive Learning Pathways:** Game-enhanced educational content transforms complex neurological concepts into accessible and engaging learning experiences

- **Three-Dimensional Anatomical Visualization:** High-quality visual representations feature manipulable brain and spinal cord models incorporating authentic anatomical cross-sections
- **Guided Clinical Decision-Making:** Educational simulations facilitate student navigation through therapeutic processes, encompassing fundamental movement assessment and strength evaluation techniques
- **Adaptive Difficulty Progression:** Educational architecture builds foundational understanding through escalating clinical complexity and enhanced decision-making requirements
- **Cross-Curricular Resource Integration:** A unified educational platform serves multiple academic courses throughout the program, minimizing reliance on course-specific textbooks

Bölüm 11

Türk Ailesinde Rollerin Değişmesine Neden Olan Unsurların Kritiği

Osman Özkul[1]

Ahmet Küçük[2]

Özet

Bu çalışma, Türk aile yapısının dönüşümünü üç temel dinamik üzerinden eleştirel bir şekilde incelemektedir: Avrupa Birliği uyum sürecindeki yasal reformlar, İstanbul Sözleşmesi ve dijital iletişim teknolojilerinin yükselişi. Tarafsız bir bakış açısının aksine, bu çalışma, yasal değişikliklere karşı toplumsal direnç, toplumsal cinsiyet eşitliği politikaları etrafındaki kamuoyu tartışmaları ve dijital platformların aile etkileşimleri üzerindeki ikircikli etkileri gibi tartışmalı yönleri vurgulamaktadır. Analiz, AB tarafından yönlendirilen yasal reformların eşitliği teşvik etmeyi amaçlamasına rağmen, etkilerinin sosyoekonomik ve bölgesel bağlamlarda farklılık gösterdiğini ve bazen kuşaklar arası ve kültürel gerilimleri şiddetlendirdiğini ortaya koymaktadır. İstanbul Sözleşmesi, kadınları koruma niyetlerine rağmen, kutuplaşmış tepkileri tetikleyerek hem erkeklerin hem de kadınların aile rollerine ilişkin algılarını karmaşık şekillerde yapılandırmıştır. Dijital iletişim teknolojileri, artan bağlantı fırsatlarının yanı sıra gizlilik zorlukları, kuşaklar arası çatışmalar ve yeni sosyal baskılar getirerek aile dinamiklerini daha da karmaşık hale getirmektedir. Bu çalışma, yasal, kültürel ve teknolojik perspektifleri bütünleştirerek, çağdaş Türk aile yaşamını etkileyen çok yönlü ve bazen çelişkili süreçlere dair eleştirel bir anlayış sunmaktadır.

Giriş

Türkiye'de aile yapısı, tarihsel olarak geleneksel değerler, dini normlar ve devletin hukuki düzenlemeleri arasında şekillenmiştir. Osmanlı döneminden Cumhuriyet'e geçişle birlikte aile kurumu, modernleşme politikalarının odağında yer almış; medeni hukuk düzenlemeleriyle birlikte aile ilişkileri devletin pozitif hukuku aracılığıyla yeniden tanımlanmıştır. Bu travmayı, toplum kültürel genetik özellikleri ve yaşlı kuşakların derin bilgeliği sayesinde nisbeten daha aza hasar ile atlatabilmiştir. 20. yüzyılın ikinci yarısından itibaren ise, sanayileşmeye bağlı kentleşme, seküler içerikli eğitim sisteminin artması ve geçim zorluklarına neden olan ekeonomik problemler ndeniyle kadınların iş gücüne katılımının artışı, aile yapısının ve aile rollerinde önemli değişimlere yol açmıştır. Fakat bu değişimler de nisbeten tolere edilebilir derecede sınırlı kalmıştır. Ancak 21. yüzyılda Türk aile yapısı ve ailenin temelini oluşturan ana-baba ve çocukların rolleri, üç temel faktör tarafından derinden etkilenmiştir: Avrupa Birliği uyum sürecinde yapılan medeni hukuk reformları, İstanbul sözleşmesi metninin etkileri, dijitalleşme veya dijital medyanın aile içi iletişim üzerindeki etkileri. Bu makalede, söz konusu değişimlerin Türk aile yapısı ve rollerine yaptığı, yalnızca yapıcı etkilerini değil, aynı zamanda toplumsal çatışmalara, norm farklılıklarına ve kültürel gerilimlere yol açan yönleri de eleştirel bir perspektifle incelenmektedir.

Türk aile yapısındaki dönüşüm, hukuki reformlar, uluslararası sözleşmeler ve dijitalleşme gibi birbirini etkileyen üç temel dinamik tarafından şekillendirilmektedir. Ancak bu süreçler, her zaman tek yönlü ve homojen bir değişime neden olmamış; toplumsal direnç, kültürel norm farklılıkları ve teknolojiye adaptasyon problemleri gibi daha geniş çeşitliliğe sahip tartışma ve çatışma alanlarının ortaya çıkmasına yol açmıştır.

Aslında daha sağlıklı bir aile yapısına kavuşabilmek ve daha az çatışmalı problemlerle karşılaşmak için, bu konuların çok farklı boyutlarda ele alınması ve karar mekanizmalarının daha şeffaf ve uzun vadeli hedeflere ve perspektiflere dayandırılması gerekirdi. Şimdi girift ve aile yapısı üzerinde derin etkiler bırakmış olan bu tartışma alanlarının, en azından bundan sonraki süreçte, daha tutarlı ve verimli tartışmalar ve incelemelere dayandırılması gerekmektedir. Bunun ilk adımlarından birisi olan bu yılın Türkiye'de "aile yılı" olarak ilan edilmesi, sadece resmi ve politik bir icraat olmaktak daha ileriye taşınmalıdır. Gerçekten toplumsal ve kültürel gerçekliklerle uyumlu çalışmalar gerçekleştirilmelidir. Aşağıdaki alt başlıklarda bu amaca yönelik olarak, temel problem noktaları analiz ve kritik edilmeye çalışılmaktadır.

1. Avrupa Birliği Uyum Sürecinde Medeni Hukuk Değişikliklerinin Aile Yapısına Etkisi

2000'li yılların başında Türkiye'nin Avrupa Birliği'ne aday ülke statüsünü kazanmasıyla birlikte, hukuk sisteminde köklü reformlar gerçekleştirilmiştir. 2001–2005 yılları arasında çıkarılan uyum paketleri, özellikle hukuk açısından kadın-erkek rollerinin depişmesi ve aile hukukunun Batılılaştırılması açısından kritik bir dönüm noktası olmuştur. 2001 yılında kabul edilen yeni Türk Medeni Kanunu, aile içi rollerin yeniden tanımlanması konusunda, Türk tarihinde gerçekleşen en önemli yasal düzenlemelerden birisidir.

2000'li yılların başından itibaren Türkiye'nin Avrupa Birliği adaylığı konusunda, 20. yüzyılda olduğundan daha fazla biçimde hukuk sisteminde kapsamlı değişiklikleri beraberinde getirmiştir. Medeni Kanun başta olmak üzere yapılan reformlar, aile içi eşitliği sağlamak ve kadınların haklarını güvence altına almak amacını taşısa da Pratik uygulamalarda önemli kültürel problemler sınırlılıklar ve toplumsal dirençlerle karşılaşmıştır.

Mesela, 1926 tarihli Medeni Kanun'un bazı hükümleri, aile içinde erkeği "aile reisi" olarak tanımlarken; yeni kanun bu ifadeyi kaldırarak "eşitlik" ilkesini temel almıştır. Kanunla birlikte, evlilik birliği içinde karar alma süreçlerinde eşitlik sağlanmış; aile konutunun seçimi ve yönetimi artık ortak kararlara dayandırılmıştır. Bu değişiklik, kadınların aile içindeki konumunu güçlendirmiş ve geleneksel rollere dayalı yapının hukuki dayanaklarını büyük ölçüde ortadan kaldırmıştır. Bu durumun en önemli sonuçlarından birisi ise, kadın erkek çatışmalarının artması bununla ilgili olarak boşanma oranlarının ve kadın cinayetlerinin artması olmuştur.

2001 tarihli yeni Medeni Kanun, aile içi karar alma süreçlerinde eşitliği hedeflemiş, aile reisliği kavramını kaldırmıştır. Ancak bu hukuki değişikliklerin toplumun tüm kesimlerinde benimsenmesi aynı hızda gerçekleşmemiştir. Kırsal bölgelerde ve geleneksel aile yapısına sahip topluluklarda erkeklerin otoritesi ve kadının ev içindeki rolü hâlen güçlü bir norm olarak devam etmektedir.

Yeni medeni Kanun'la birlikte "edinilmiş mallara katılma rejimi" "yasal mal rejimi" olarak kabul edilmiştir. Bu düzenleme, evlilik süresince edinilen malların boşanma halinde eşit paylaşımını öngörmektedir. İlk bakışta bu değişmelerle kadınların ev içi emeği de ekonomik değer kazanmış ve boşanma durumunda kadınların ekonomik güvenliği güçlenmiştir (Acar ve Ayata, 2002). Ancak, bundan daha çok da kültürel gecikmenin bir tezahürü olarak ailedeki karı ve kocanın çatışma unsurlarını çoğaltmıştır. Ayrıca miras hukukunda yapılan değişikliklerle kız ve erkek çocuklar

arasındaki miras paylaşımı eşitlenmiştir. Edinilmiş mallara katılma rejimi ve velayet düzenlemeleri, ayrıca teorik olarak kadınların haklarını güvence altına almış, ekonomik eşitliği teşvik etmiştir. Ancak uygulamada, özellikle ekonomik kaynaklara erişimi sınırlı olan kadınlar, hukuki haklarını etkin biçimde kullanmakta güçlük yaşamıştır. Boşanma ve velayet davalarında mahkemelerin uygulamaları farklılık göstermiş, bu da değişikliklerin eşitlik hedefini sınırlamıştır.

Yeni düzenlemeler, boşanma süreçlerini daha sistematik hale getirmiş; özellikle kadına yönelik şiddet, zina, terk gibi boşanma sebeplerinde kadınların haklarını genişletmiştir. Çocukların velayeti konusunda da "çocuğun üstün yararı" ilkesi benimsenmiş; bu yaklaşım, annelerin velayet konusunda daha güçlü bir konuma gelmesine yol açmıştır (Bozkurt, 2012). Hukuki reformlar, hedef olarak Batılılaşma projesinin bir unsuru olan eşitlikçi aile modellerinin benimsenmesini teşvik ederken; pratik uygulamalarda geleneksel normlar ile reformlar arasında çatışmalara yol açmıştır. Bu hukuki reformlar, aile içinde kadınların ve erkeklerin rollerinde önemli değişikliklere neden olmuştur. Geleneksel kültüre bağlı olarak erkeğin koruyucu rolünün otorite figürü haline dönüşmesine bir tepki olarak gerçekleştirilen yeniliklerin hakim olduğu bu yeni aile yapısı, yerini eşitlikçi karar alma süreçlerine bırakması beklenmiştir. Ancak bu dönüşümün her kesimde eşit şekilde yaşandığını söylemek güçtür. Özellikle kırsal bölgelerde geleneksel uygulamalar güçlü biçimde varlığını sürdürürken, büyük şehirlerde yasal düzenlemeler aile ilişkilerine daha hızlı yansımıştır (Yüksel, 2015).

AB uyum sürecindeki reformlar, özellikle muhafazakâr Türk toplumu tarafından tartışmalara neden olmuştur. Kadın-erkek eşitliği iddiasını merkeze alan hukuki düzenlemeler, bazı gruplar tarafından aileyi zayıflatıcı ve geleneksel değerleri tehdit edici olarak şüphe ile karşılanmıştır (Arat, 2010). Ancak, bu şüphenin ne kadar haklı olduğu, geçen yıllar boyunca daha iyi anlaşılmaktadır. Ailede boşanma oranları artmakta, kadın cinayetlerinin önüne geçilememekte ve evlilik oranları gittikçe dramatik bir boyuta erişmiştir.

2. İstanbul Sözleşmesi Maddelerinin Kadın ve Erkek Tutumları Üzerindeki Etkisi

2011 yılında Avrupa Konseyi tarafından kabul edilen ve Türkiye'nin ilk imzacısı olduğu "Kadınlara Yönelik Şiddet ve Aile İçi Şiddetin Önlenmesi ve Bunlarla Mücadeleye Dair İstanbul Sözleşmesi", toplumsal cinsiyet eşitliğini temel alan kapsamlı bir uluslararası belge olarak takdim edilmiştir. Türkiye, sözleşmeyi 2011'de imzalamış ve 2014 yılında yürürlüğe

koymuştur. Sözleşme, hem devletlere kadınlara yönelik şiddeti önleme konusunda yükümlülükler getirmiş hem de kadın ve erkeklerin aile içindeki rollerine ilişkin toplumsal algılarda çok önemli değişiklikler yapmıştır. Tarih boyunca, Türk toplumunun kültür, ahlak ve dini değerleri ile çatışan hukuki değişikliklerin en etkileyicilerinden birisi olduğu geçen uzun yıllar sonucunda fark edilmiştir.

Türk toplumuna İstanbul Sözleşmesi'nin temel amacı, kadınlara yönelik her türlü şiddeti önlemek, mağdurları korumak ve failleri cezalandırmak olarak yansıtılmaktadır. Buna göre, sözleşmede dört temel unsur öne çıkarılmaktadır: 1) Şiddetin önlenmesi, 2) Mağdurların korunması, 3) Suçluların kovuşturulması, 4) Bütüncül politika yaklaşımı. Ayrıca sözleşme, toplumsal cinsiyet kalıplarının değiştirilmesi gerektiğini vurgular (Bozkurt, 2014). Sözleşmenin kadınlar üzerindeki etkilerine bakılacak olursa, sözleşmenin yürürlüğe girmesiyle kadınların haklarını arama kapasitesi teorik olarak güçlendiği varsayılmaktadır. Ayrıca, mağdurları koruma mekanizmaları, hukuki süreçlerde kadınların lehine değişiklikler ve farkındalık kampanyalarının da kadınlar arasında güven duygusunu vurgulanmaktadır.

Sözleşmenin yürürlüğe girmesiyle birlikte kadınların aile içindeki konumuna ilişkin farkındalık artmıştır. Özellikle şiddete maruz kalan kadınların yasal mekanizmalara erişimi kolaylaşmış, ALO 183 hattı vb. gibi destek mekanizmaları yaygınlaştırılmıştır. Kadın örgütleri, sözleşmeyi kadınların kamusal ve özel alanlarda güçlenmesi açısından bir "hukuki kalkan" olarak değerlendirmiştir (Çavdar ve Yılmaz, 2019). Fakat sonuçlara bakıldığında, aynı iyimser ifadeleri kullanmak mümkün görülmemektedir. Özellikle, önceden erkekler lehine olan mahalle baskısının, şimdi kadınlar lehine dönüşmesini, kültürel ve psikolojik olarak özümseyememiş ve kabullenememiş erkekler, hukuki erke dayanarak cesaretle konuşan ve karar veren kadınlara karşı, fiziki güce ve cinayetlere yönelmiştir. Nitekim bu yönüyle erkekler üzerindeki algılar ve tepkiler sözleşmenin bazı erkekler tarafından "potansiyel fail varsayımı" oluşturduğu iddia edilmektedir. Tartışma ve çatışma süreçlerinde kadınların beyanlarının delil aranmaksızın esas alınması; boşanma ve velayet süreçlerinde, erkeklerin dezavantajlı duruma düştüğü algısı, erkeklerdeki şüpheyi, direnci ve tepkiyi artırmıştır. Sözleşmenin toplumsal etkisi yalnızca kadınlarla sınırlı kalmamıştır. Erkeklerin aile içindeki rollerine ilişkin algılarında da önemli değişimler gözlemlenmiştir. Bazı erkek grupları, sözleşmenin erkekleri "potansiyel fail" olarak gösterdiğini savunmuş; boşanma süreçlerinde velayet ve nafaka gibi konularda erkeklerin dezavantajlı duruma düştüğünü iddia etmiştir (Güneş ve Ayata, 2016). Bu nedenle bazı erkekler, aşırı tepkiler göstermekte kendilerini mazur görür hale gelmiştir. Toplumsal kutuplaşma ve medya

tartışmaları bakımından bu sözleşme, Türkiye'de toplumsal ve siyasal bir tartışma nesnesi haline gelmiştir. Muhafazakâr kesimler sözleşmenin aileyi ve geleneksel değerleri tehdit ettiğini savunurken; kadın hakları savunucuları sözleşmeyi koruma ve eşitlik aracı olarak görmektedir (Çavdar ve Yılmaz, 2019). Hatta siyasi bakımdan Türkiye'nin en çok oy alan iki siyasi partisi ve taraftarlarının bir çatışma alanına dönüşmüştür. Toplumsal algı ve kamusal tartışmalar açısından bakıldığında, sözleşmenin imzalanmasından sonraki yıllarda yapılan araştırmalar, toplumda sözleşmeye ilişkin bilgi düzeyinin sınırlı olmakla birlikte, kadınların büyük çoğunluğunun sözleşmenin varlığını olumlu değerlendirdiği iddia edilmektedir (TÜSİAD, 2019). Ancak bu görüşün ideolojik ve Batılılaşmacı bir paradigmaya dayandığı söylenebilir. Muhafazakâr kesimlerde, siyasi taraftarlık nedeniyle, uzun yıllar boyunca, başını kuma gömerek, gerçekleri görememiştir. Ancak son yıllarda, Batı karşıtlığı tartışmalarının yoğunlaşması ve dramatik sonuçların görülmeye başlanmasıyla, sözleşmenin aileyi zayıflattığı, hatta "dağıttığı" yönünde eleştiriler de gelişmeye başlamıştır. Daha çok Türk toplumunun muhafazakâr kesimlerinde sözleşmenin "aileyi zayıflattığı" yönünde güçlü eleştiriler gelişmiştir. Özellikle "toplumsal cinsiyet" kavramının bazı çevrelerde "geleneksel cinsiyet rollerini yok ettiği" yönünde algılanması, sözleşmenin meşruiyetini tartışmalı hale getirmiştir. 2021 yılında Türkiye'nin sözleşmeden Cumhurbaşkanlığı Kararnamesi ile çekilmesi, bu tartışmaların ne kadar derinleştiğini göstermektedir (Resmî Gazete, 2021).

Çekilme kararına rağmen sözleşmenin toplumsal etkileri tamamen ortadan kalkmamıştır. Yasal reformlar ve oluşturulan farkındalık, kadın-erkek ilişkilerinde daha eşitlikçi bir dilin yaygınlaşmasına katkıda bulunmuştur. Ancak uygulamada yaşanan aksaklıklar, özellikle kırsal bölgelerde ve düşük gelirli kesimlerde sözleşmenin etkisinin sınırlı kalmasına yol açmıştır (Kaya ve Ercan, 2022).

Aile içi roller açısından değerlendirildiğinde, İstanbul Sözleşmesi'nin aile yapısına etkisi hem hukuki hem de kültürel bakımdan değerlendirildiğinde iki yönlü olmuştur. Hukuki düzeyde, kadınların korunmasına yönelik mekanizmalar güçlendirilirken; beklenmedik şekilde kadın erkek çatışması kışkırtılmaktadır. Diğer taraftan kültürel düzeyde ise, toplumsal cinsiyet rollerinin Batı toplumunun kültürel kodlarına göre yeniden tanımlanması yapılarak, aktif kadın pasif erkek yaklaşımı teşvik edilmektedir. Böylece kadınlar ve erkekler tarafından geleneksel olarak benimsenen toplumsal rollerin yerine bu statüleri küçümseyip, dışlayan bir bakış açısına alan açılmaktadır. Böylece, kadının ekonomik özgürlüğü söylemi üzerine inşa edilen feminist mahalle baskısı sonucunda, annenin evden/çocuğundan mahrum bırakılması ve uzaklaştırılması tehlikesi yaygınlaşmaya başlamıştır. Kadının aile içindeki

"anne" rolünün karşısına bir alternatif olarak konulan, "çalışan kadın" rolü, güçlü bir mahalle baskısı oluşturmaktadır. Kadınlara duygusal bir rüşvet olarak ise, bireysel özgürlüğünü kazanma vaat edilmektedir. Oysa esas hedef, geleneksel Türk toplumunda kendi ailesi için üreten kadını; başkaları için üreten ve tüketim toplumunun aktif bir üyesi haline getirmektir.

3. Dijital Mecralara Dayalı İletişim Araçlarının Aile Yapısına Etkisi

21. yüzyılda aile kurumunu etkileyen en güçlü dönüşüm dinamiklerinden biri de dijitalleşmedir. İnternetin yaygınlaşması, akıllı telefonların kullanımı ve sosyal medya platformlarının günlük yaşamın ayrılmaz bir parçası haline gelmesi, aile içi iletişim biçimlerini kökten değiştirmiştir (Castells, 2008; TÜİK, 2023).

Dijital iletişim araçlarının yaygınlaşması genel olarak dijitalleşme, Türk aile yapısını etkileyen en belirgin ve tartışmalı faktörlerden biridir. İnternet, akıllı telefonlar ve sosyal medya platformları, aile bireylerinin iletişim biçimlerini dönüştürmekte, mahremiyet ihlali, kuşaklar arası çatışmalar ve sosyal baskı gibi yeni riskler oluşturmaktadır). Aile bireyleri WhatsApp grupları, video görüşmeleri veya sosyal medya üzerinden haberleşmekte; özellikle şehirlerarası veya uluslararası göçle parçalanmış ailelerde dijital araçlar "birlikte olma" hissini güçlendirmektedir.

İletişim ve dayanışma bakımından dijital araçlar, aile bireylerinin mekânsal olarak ayrı olsalar bile etkileşimde kalmasını sağlamaktadır. Dijital iletişim araçları, aile bireylerinin mekânsal olarak ayrı olsalar bile etkileşimde kalmasını sağlamaktadır. Uzaktan eğitim, evden çalışma ve sosyal medya aracılığıyla yapılan iletişim, özellikle göçle parçalanmış ailelerde "birlikte olma" hissini güçlendirmektedir (Çetin ve Koçak, 2021). Ayrıca, çevrim içi platformlar ailelerin kriz durumlarında hızlı bilgi paylaşımı ve dayanışma mekanizmaları geliştirmesine imkân tanımaktadır. Ancak diğer taraftan sosyal medya ve diğer dijital platformlar, aile bireylerinin mahremiyet sınırlarını bulanıklaştırmaktadır. Ebeveynlerin çocuklarının fotoğraflarını paylaşması veya eşlerin sosyal medya kullanım alışkanlıkları, kıskançlık ve güven problemlerine yol açabilmektedir. Ayrıca, dijital araçlar, özellikle ergenler ve genç yetişkinler arasında aşırı kullanım veya bağımlılık risklerini artırmakta; ebeveynlerle kuşaklar arası çatışmalara sebep olabilmektedir. Toplumda dijitalleşmenin yaygınlaşması, ebeveynlik rollerinde de önemli değişikliklere sebep olmaktadır. Ebeveynler, çocuklarının dijital ortamlardaki etkinliklerini denetleme, yönlendirme ve koruma sorumluluğu taşımaktadır (Çetin, 2022).

Dijitalleşme, kuşaklar arası ilişkilerde uçurumun artmasına neden olmaktadır. Genç kuşaklar dijital araçlara daha hızlı adapte olurken, yaşlı kuşaklar çoğu zaman bu teknolojileri kullanmakta zorlanmakta, sınırlı düzeyde kullanmakta veya teknolojiye direnç göstermektedir. Bu durum, aile içi iletişimde kopukluklara sebep olmakta, aile içinde "dijital uçurum" oluşturabilmektedir. Kuşaklar arası dijital uçurum ve dijital adaptasyon farkları, aile içi iletişimde kopukluklar oluşturmakta, kuşaklar arası anlayış ve uyum problemlerini gündeme getirmekte ve kuşaklar arası çatışmalara sebep olmaktadır. Mesela bazı genç aile bireyleri özel hayatlarının belirli kısımlarını sosyal medya üzerinden paylaşarak kamusal alanda görünür hale getirmektedir. Bu durum, aile mahremiyetinin sınırlarını bulanıklaştırmakta ve zaman zaman aile içi çatışmalara yol açmaktadır.

Dijitalleşmenin aile yapısına etkisini çift yönlü olarak ele almak mümkündür. Bir yandan iletişimi kolaylaştırmakta, aile bağlarını güçlendirebilen araçlar sunmakta; diğer yandan bağımlılık, mahremiyet ihlali ve kuşaklar arası çatışma gibi yeni riskler oluşturmaktadır. Dijitalleşme, aile bireylerinin rollerini yalnızca iletişim düzeyinde değil, ekonomik ve sosyal düzeyde de yeniden tanımlamaktadır. Evden çalışma, toplumsal cinsiyet rollerine ilişkin yeni tartışmaları gündeme getirmektedir.

Diğer yandan da dijitalleşme, ebeveynlerin çocuklarının dijital aktivitelerini denetleme ve yönlendirme sorumluluğunu artırmış, aile içi rol paylaşımında yeni çatışma alanları doğurmuştur Dijitalleşme, ebeveynlik rollerini de yeniden şekillendirmektedir. Ebeveynler, çocuklarının dijital dünyadaki aktivitelerini denetleme, yönlendirme ve koruma sorumluluğu taşımaktadır. Bu durum, aile içi iş bölümünü ve karar alma süreçlerini etkilemekte, ebeveynler arasında yeni çatışma alanları yaratmaktadır. Öte yandan, dijital araçlar eğitim ve sosyal gelişim açısından fırsatlar sunmaktadır, bu da modern ebeveynliğin karmaşık ve çatışmalı bir yapısının varlığını ortaya koymaktadır (Çetin, 2022). Bu nedenle dijitalleşmenin etkilerini incelerken, aile içinde yol açtığı problemleri dikkate almak gerekir.

Son yıllarda Türkiye'de kadının iş gücüne katılım oranının artması, aile içi rollerin yeniden şekillenmesine neden olmuştur. Geleneksel olarak kadının ev ve çocuk bakımıyla özdeşleştiği aile yapısı, ekonomik ve sosyal zorunluluklar nedeniyle değişime uğramaktadır. Kadınların çalışma hayatına aktif olarak katılması, aile gelirini artırmakta ve ekonomik bağımsızlık sağlamaktadır; ancak bu durum bazı yan etkiler de yapmaktadır. Özellikle küçük yaştaki çocukların günlük bakım ve ilgisinde azalma gözlemlenmektedir. Çalışan annelerin yoğun iş temposu, çocuklarla yeterli zaman geçirememelerine yol açmakta, bu durum çocukların duygusal ve sosyal gelişiminde eksikliklere

neden olabilmektedir. Ayrıca, aile içi görev dağılımı hâlâ çoğunlukla kadın üzerinde yoğunlaşmakta, erkeklerin ev içi sorumlulukları sınırlı kalmaktadır. Bu durum, hem kadının üzerindeki bakım yükünü artırmakta hem de çocukların ihtiyaç duyduğu ilgi ve rehberliği eksik bırakmaktadır. Diğer yandan, teknoloji ve dijital iletişim araçları bazı dengelemeler sağlamaktadır; ebeveynler, iş yerinden kısa süreli iletişimle çocuklarıyla bağlantıda kalabilmektedir. Ancak bu, yüz yüze etkileşimin yerini tamamen dolduramamaktadır. Dolayısıyla, kadının iş hayatına katılımı ekonomik ve toplumsal açıdan olumlu bir adım olmakla birlikte, aile içi rollerin yeniden düzenlenmesi ve eşit görev paylaşımı sağlanmadığı sürece, çocukların yeterli ilgiyi görememesi gibi olumsuz sonuçlar devam etmektedir.

4. Sonuç

Türk aile yapısı, tarihsel olarak geleneksel değerlerin, dini normların ve devletin düzenleyici rolünün birleşimiyle şekillenmiş bir kurumdur. 21. yüzyılda ise Avrupa Birliği uyum süreci, İstanbul Sözleşmesi ve dijitalleşme, aile kurumunu dönüştüren üç temel dinamik olarak öne çıkmaktadır. Bu üç faktörün etkileşimi, aile yapısının homojen olmadığını, farklı toplumsal gruplarda farklı değer sistemlerinin bir arada var olduğunu göstermektedir.

Türkiye'de yukarıda sayılan hukuki, siyasi ve teknolojik faktörlerin etkisiyle kadının iş gücüne katılımı son yıllarda önemli ölçüde artmıştır (TÜİK, 2023). Bu durum ekonomik bağımsızlık ve toplumsal statü açısından olumlu bir gelişme olarak değerlendirilmektedir; ancak aile içi rollerin yeniden düzenlenmesini zorunlu kılmaktadır. Geleneksel olarak ev ve çocuk bakımından sorumlu olan kadınlar, çalışma hayatının yoğun temposu nedeniyle çocuklarına ayırabilecekleri zamanı sınırlı hâle getirmektedir (Çağlar, 2019). Bu durum, özellikle küçük yaştaki çocukların duygusal ve sosyal gelişimini etkileyebilmekte, aile içi etkileşimi azaltabilmektedir. Ayrıca, ev işlerinin ve çocuk bakımının hâlâ büyük ölçüde kadın üzerinde yoğunlaşması, toplumsal cinsiyet eşitsizliğini pekiştirmektedir. Dijital iletişim araçları, ebeveynlerin çocuklarıyla kısa süreli etkileşim kurmasına olanak sağlasa da yüz yüze etkileşimin yerini tam olarak dolduramamaktadır. Sonuç olarak, kadının iş hayatına katılımı ekonomik ve toplumsal açıdan olumlu bir adım olmakla birlikte, çocukların yeterli ilgiyi görmesi için aile içi sorumluluk paylaşımının yeniden düzenlenmesi ve toplumsal farkındalığın artırılması gerekmektedir. Bu bağlamda, erkeklerin ev içi rolü ve bakım sorumlulukları da eşit bir şekilde paylaşılmalıdır.

Türk aile yapısındaki dönüşüm, hukuki reformlar, İstanbul Sözleşmesi ve dijitalleşme tarafından şekillendirilmiştir. Ancak bu süreçler, toplumsal

direnç, kültürel normlar ve teknolojiye adaptasyon sorunları nedeniyle karmaşık ve çelişkili sonuçlar doğurmuştur. Aile yapısının geleceği, hukuki ve teknolojik reformların yanında kültürel farkındalık, eğitim ve toplumsal uzlaşı çabalarıyla şekillenecektir. Türkiye'de çeşitli faktörlerin etkisi ile aile içindeki ana-babanın rol değişimi, kadının ekonomik ve sosyal hayattaki konumunu güçlendirirken, çocukların gelişimi ve aile içi etkileşim açısından yeni stratejiler geliştirilmesini zorunlu kılmaktadır. İş ve aile hayatının dengelenmesi, erkeklerin sorumluluk paylaşımının kültürel yapı ile uyumlu bir biçimde yorumlanması ve toplumsal hassasiyetin yükseltilmesi, sağlıklı bir aile yapısı için kritik öneme sahiptir.

Bölüm 2

Probiyotik ve Prebiyotiklerin Sporcu Beslenmesindeki Rolü

Senanur Dönmez[1] -
Asiye Hande Başkan[2]

Özet

Bu bölümde probiyotik ve prebiyotiklerin sporcu beslenmesindeki rolü ele alınmaktadır. Bağırsak mikrobiyotası, bağışıklık sistemi, performans ve toparlanma süreçleri açısından sporcu sağlığının kritik bir bileşeni olarak değerlendirilmektedir. Probiyotikler, uygun dozlarda alındığında konağın bağırsak sağlığını destekleyen canlı mikroorganizmalar olup fermente gıdalar başlıca kaynaklarını oluşturmaktadır. Prebiyotikler ise sindirilemeyen karbonhidrat yapısındaki bileşikler olup faydalı mikroorganizmaların gelişimini teşvik etmektedir.

Sporcularda probiyotik ve prebiyotik kullanımı; bağışıklık sisteminin güçlendirilmesi, üst solunum yolu enfeksiyonlarının azaltılması, gastrointestinal rahatsızlıkların önlenmesi, inflamasyonun baskılanması ve oksidatif stresin azaltılması gibi yararlar sunmaktadır. Ayrıca enerji metabolizmasının desteklenmesi, besin emiliminin artırılması, kısa zincirli yağ asitlerinin üretimi ve bağırsak–beyin ekseninin düzenlenmesi yoluyla psikolojik iyi oluş üzerinde de olumlu etkiler göstermektedir.

Uygulamada bireysel farklılıklar, doz, süre ve kullanım şekli göz önünde bulundurulmalı; hem gıda kaynaklı hem de takviye formlarında güvenli ve kontrollü kullanım esas alınmalıdır. Sonuç olarak, probiyotik ve prebiyotiklerin düzenli ve uygun şekilde tüketimi, sporcularda performansın korunması, toparlanmanın hızlandırılması ve genel sağlığın desteklenmesi açısından önemli bir strateji olarak değerlendirilmektedir.

1. GİRİŞ: MİKROBİYOTA VE SPORCULARDA BAĞIRSAK SAĞLIĞI

Bağırsak mikrobiyotası, insan vücudundaki pek çok fizyolojik süreçte rol oynamakta ve sporcu beslenmesinde giderek daha fazla önem kazanmaktadır. Mikrobiyota ve egzersiz arasındaki ilişkinin, performans, bağışıklık sistemi ve toparlanma süreçleri bağlamında ele alındığı görülmektedir. Bu doğrultuda probiyotik ve prebiyotik içeren besinler ve takviyeler de sporcu beslenmesinde dikkate alınan unsurlardan biri haline gelmiştir.

Konakçıyla simbiyotik biçimde birlikte yaşayan tüm mikroorganizmalar mikrobiyota olarak tanımlanırken, bu mikroorganizmaların genetik materyali mikrobiyom olarak adlandırılır. Mikrobiyom bakteriler, arkeler, mantarlar, protozoalar ve virüsleri içeren oldukça karmaşık bir yapıya sahiptir(El-Sayed ve ark., 2021; Methé ve ark., 2012).İnsan vücudunda mikrobiyal hücre sayısının yaklaşık 10^{14} olduğu ve bunların yaklaşık %90'ının bağırsaklarda bulunduğu öngörülmektedir(Xu ve Knight, 2014).Bileşim ve fonksiyonel kapasite açısından kişiden kişiye farklılık gösteren mikrobiyota, bağışıklık yanıtlarının düzenlenmesine katkıda bulunur ve organizmanın sağlıklı ya da hastalıklı durumlarla ilişkili biyolojik süreçlerinde önemli bir rol oynar(Abt ve Artis, 2009).

Sporcularda bağırsak sağlığı, mikrobiyota ile beslenme ve antrenman alışkanlıkları arasındaki etkileşimler aracılığıyla performansın sürdürülmesi ve toparlanmanın hızlanmasında önemli bir rol oynamaktadır(Chen ve ark., 2024). Bu alandaki araştırmalar, sporcularda bağırsak mikrobiyotasının çeşitliliği ve işlevlerinin performans, kas uyumu ve toparlanma süreçleri üzerindeki etkilerini inceleme yönünde giderek artmaktadır (Codella ve ark., 2017).

Bu doğrultuda bölümde özellikle sporcularda bağırsak mikrobiyotasını etkileyen probiyotik ve prebiyotiklerin; performans, toparlanma, bağışıklık, sindirim ve psikolojik süreçler üzerindeki potansiyel katkıları ele alınacaktır.

Probiyotikler

Probiyotikler, bağırsak mikrobiyal dengesini destekleyerek tüketicilerin sağlığına katkıda bulunan, uygun miktarlarda alındığında konağa sağlık yararı sağlayan canlı mikroorganizmalardır (Kerry ve ark., 2018). Asit ve safra tuzlarına karşı direnç göstererek gastrointestinal sistemde canlılıklarını koruyarak, bağırsak yüzeyine tutunma yetenekleri sayesinde mikrobiyal dengeyi olumlu yönde düzenler. Ayrıca antimikrobiyal bileşikler ve metabolitler üreterek konağın bağırsak sağlığının korunmasına ve patojenlerin baskılanmasına katkıda bulunurlar (Charitos ve ark., 2025).

Genel olarak güvenli kabul edilen maddeler (GRAS) kapsamında değerlendirilen probiyotiklerin, başlıcaLactococcus*(L. lactis, L. reuteri, L. rhamnosus, L. casei, L. acidophilus, L. curvatus, L. Plantarum)*, Lactobacillus*(L. plantarum, L. paracasei, L. acidophilus, L. casei, L. rhamnosus, L. crispatus, L. gasseri, L. reuteri, L. bulgaricus)*, Streptococcus*(S. sanguis, S. oralis, S. mitis, S. thermophilus, S. salivarius)*, Enterococcus*(E. faecium)*ve Bifidobacterium*(B. longum, B. catenulatum, B. breve, B. animalis, B. bifidum)* olmak üzere;Bacteroides *(B. uniformis)*,Propionibacterium *(P. jensenii, P. freudenreichii)*, Peptostreptococcus *(P. productus)*, Bacillus *(B. coagulans, B. subtilis, B. Laterosporus)*, Pediococcus *(P. acidilactici, P. pentosaceus)*, Akkermansia *(A. muciniphila)*, Saccharomyces *(S. boulardii)*türleri bulunmaktadır (Kerry ve ark., 2018).

Fermantasyon, mikroorganizmalar veya enzimler sayesinde gıdaların besin değerini ve biyoyararlılığını artıran bir süreçtir. Bu süreç, bazı gıdalarda doğal olarak bulunan probiyotikleri aktive etmektedir ve probiyotiklerin büyümesi ve çoğalması için uygun ortam sağlamaktadır; böylece fermente gıdalar probiyotik kaynağı hâline gelmektedir (Sharma ve ark., 2020).
Fermente süt ve süt ürünleri (yoğurt, kefir, peynir, ayran gibi) sindirimi düzenler, laktoz sindirimini artırır ve bağışıklık fonksiyonlarını güçlendirir. Bitki bazlı fermente ürünler (lahana turşusu, kimchi, miso, tempeh, natto, kombucha vb.) bağırsak mikrobiyotasının çeşitliliğini artırır, antioksidan kapasiteyi yükseltir ve bağışıklık yanıtlarını modüle eder. Tahıl bazlı fermente ürünler (boza, tarhana, fermente pirinç ve mısır içecekleri) hem probiyotik mikroorganizmaları hem de prebiyotik lifleri içererek sindirim sağlığı ve enerji metabolizmasını iyileştirir. Fermente et ve balık ürünleri (sucuk ve bazı balık sosları) probiyotik bakteri türlerini barındırır ve protein sindirilebilirliğini artırır; ancak yüksek tuz içerikleri nedeniyle tüketim miktarlarına dikkat edilmelidir (D'Almeida et al., 2024).

Prebiyotikler

Prebiyotikler; konakçının enzimleriyle sindirilemeyen polisakkarit ve oligosakkaritler olup, gastrointestinal sisteme ulaştıklarında yararlı bağırsak bakterilerinin seçici olarak büyümesini ve metabolik faaliyetleriuyararak sağlık üzerinde olumlu etkiler gösteren bileşiklerdir (Patel & Goyal, 2012).

Prebiyotikler, gelişim aşamaları ve düzenleyici özelliklerine göre farklı gruplara ayrılmaktadır. Bu sınıflamaya göre yerleşik prebiyotikler inülin, galaktooligosakkaritler, fruktooligosakkaritler ve laktüloz; yükselen prebiyotikler ksilo-oligosakkaritler, izomaltooligosakkaritler, kitooligosakkaritler ve laktosukroz; geliştirilmekte olan prebiyotikler ise raffinoz, neoagaro-oligosakkaritler ve epilaktoz olarak tanımlanmaktadır.

Ayrıca insan sütü oligosakkaritleri, polifenoller, çoklu doymamış yağ asitleri, proteinler ve peptitler yeni potansiyel prebiyotik adayları arasında yer almaktadır (Cardoso ve ark., 2020).

Prebiyotikler, bağırsak mikrobiyotasının seçici olarak faydalı bakterilerini teşvik ederek fermantasyon yoluyla kısa zincirli yağ asitleri (SCFA) üretimini artırır; bu mekanizma, bağırsak bariyer bütünlüğünü güçlendirir, immün yanıtı düzenler, metabolik homeostazı destekler ve bağırsak-beyin ekseni aracılığıyla nöropsikiyatrik fonksiyonları olumlu yönde etkiler (Ali ve ark., 2025). Doğal olarak yer elması, hindiba, süt, bal, kuşkonmaz, soğan, pırasa, muz, sarımsak, çavdar, buğday kepeği, un ve arpa gibiçeşitli gıdalarda bulunmakta olup, konsantrasyonları kaynaklara göre değişkenlik göstermektedir (Panesar ve ark., 2022).

Bağışıklık Sistemi

Yoğun antrenman ve yarışma süreçlerinde sporcuların bağışıklık sistemi baskılanabilmekte, bağışıklık parametrelerinde meydana gelen küçük ölçekli değişimlerin birikimli etkisi üst solunum yolu enfeksiyonları gibi sağlık sorunlarına yatkınlığı artırabilmektedir (Gleeson, 2007).

Probiyotikler, epitel hücrelerine bağlanarak immün hücrelerin aktivasyonunu artırmakta, immünoglobulin ve γ-interferon üretimini desteklemekte ve patojenlerin kolonizasyonunu önleyerek bağışıklık yanıtını güçlendirmektedir. Bu süreçler, probiyotiklerin inflamasyonu düzenleyerek bağışıklık sistemine koruyucu etkiler sağladığını ortaya koymaktadır (Panesar ve ark., 2022).

Prebiyotikler, bağırsak mikrobiyotasını modüle ederek immün sistemi güçlendirdiği ve inflamasyonu azalttığı görülmüştür (Al-Habsi ve ark., 2024). Cani ve arkadaşlarının (2009) obez ve diyabetik farelerde yaptığı çalışmada, prebiyotik uygulamasının bağırsak bariyer bütünlüğünü artırdığı, inflamatuvar belirteçleri düşürdüğü ve metabolik semptomları hafiflettiği gösterilmiştir. Bu sonuçlar, prebiyotiklerin bağışıklık yanıtının düzenlenmesinde ve metabolik bozuklukların önlenmesinde önemli etkiler sağladığını göstermektedir.

Sindirim Sağlığı

Sporcularda yoğun egzersiz, mikrobiyota dengesizliği, yüksek kalori alımı ve seyahat kaynaklı stres gibi faktörlerin gastrointestinal rahatsızlıklara sebep olup, performansı olumsuz etkileyebileceği görülmüştür (Nami ve ark., 2025).

Probiyotikler, bağırsak mikrobiyotasındaki dengeyi destekleyerek gaz, şişkinlik ve ishal gibi semptomların azalmasına katkı sağlar. Özellikle antibiyotik kullanımına bağlı gelişen ishalde bağırsak florasını düzenleyerek şikâyetlerin hafiflemesine yardımcı olur. Ayrıca bağırsak bariyerini güçlendirerek patojenlerin tutunma ve çoğalma riskini azaltır (Maftei ve ark., 2024).Prebiyotikler ise bağırsak mikrobiyotasını düzenleyerek sindirim sisteminin işlevselliğini geliştirir ve özellikle inülin, fruktooligosakkaritler, galaktooligosakkaritler ile ksilooligosakkaritler gibi bileşikler aracılığıyla kalsiyum, magnezyum ve demir emilimini destekler (Yoo ve ark., 2024).

Toparlanma ve İnflamasyon

Yoğun egzersiz, sporcularda oksidatif stres düzeylerini artırarak ve inflamatuvar süreçleri tetikleyerek hem iyileşme sürecini hem de performans kapasitesini sınırlayabilmektedir (Kruk ve ark., 2021).

Probiyotikler, bağışıklık sisteminin yanıtlarını modüle ederek anti-inflamatuvar etki gösterebilmektedir. Özellikle Lactobacillus ve Bifidobacterium türlerine ait bazı suşlar, pro-inflamatuvar sitokin düzeylerini azaltma ve anti-inflamatuvar mekanizmaları destekleme potansiyeli olduğu gösterilmiştir (Falalyeyeva ve ark., 2017).Prebiyotikler, bağırsak mikrobiyotasını düzenleyerek asetat, propiyonat ve bütirat gibi kısa zincirli yağ asitlerinin üretimini artırmakta ve bu yolla immün yanıtı modüle edip pro-inflamatuvar sitokinleri baskılayarak inflamasyonla ilişkili patolojiler üzerinde terapötik etki göstermektedir (Yoo ve ark., 2024). Bu mekanizmalar, egzersiz sonrası iyileşme sürecini desteklemektedir (Bayrakdar & Zorba, 2020).

Performans ve Dayanıklılık

• Besin Emilimi ve Enerji Metabolizması:

Probiyotikler ve prebiyotikler, bağırsak mikrobiyotasını modüle ederek enerji metabolizması ve besin emilimini iyileştirir. Kısa zincirli yağ asitleri üretimini artırarak bağırsak hücrelerine enerji sağlar, glikoz ve lipid metabolizmasını düzenleyerek insülin duyarlılığını artırır ve kolesterol ile trigliserit seviyelerini düşürür. Özellikle B grubu olmak üzere, C ve K vitaminlerinin sentezini destekleyerek konakçı sağlığını güçlendirir (Maftei ve ark., 2024). Bu etkiler, özellikle enerji ihtiyacının yüksek olduğu sporcularda performansın ve toparlanmanın desteklenmesine katkı sağlar.

• Performans ve Dayanıklılık:

Probiyotikler, sporcularda bağırsak mikrobiyotasını modüle ederek besin

emilimi ve sindirim verimliliğini artırır ve bağırsak bariyer fonksiyonunu güçlendirir. Bu etkiler, enerji kaynaklarının daha etkin kullanılmasını sağlayarak sporcularda enerji homeostazını optimize eder ve dayanıklılık ile egzersiz kapasitesinin geliştirilmesine katkıda bulunur (Miles, 2020; Çevik vd. 2023; Makaracı & Bayrakdar, 2025).

Psikolojik Etkiler

Psikoloji çok boyutlu bir kavramdır (Göksel vd., 2020). Bu boyutlardan biri de Sporcu beslenmesidir. Probiyotikler ve prebiyotikler, bağırsak mikrobiyotası aracılığıyla bağırsak–beyin eksesini modüle ederek anksiyete, depresyon, ruh hali ve bilişsel işlevleri doğrudan etkiler (Nami ve ark., 2025).

Gastrointestinal mikrobiyota, humoral, immünolojik, endokrin ve sinirsel yollarla beyinle çift yönlü iletişim kurarken; disbiyoz ise bu iletişimi bozarak nörolojik ve bilişsel bozukluklara yol açmaktadır. Probiyotikler, bağırsak mikrobiyotasının dengesini yeniden sağlayarak beyin homeostazını doğrudan destekler (Kumar ve ark., 2024).

Probiyotikler, anksiyete ve depresyon semptomlarının şiddetini azaltmaktadır. Lactobacillus reuteri, L. rhamnosus ve Bifidobacterium infantis içeren probiyotik kombinasyonları, inflamatuvar yanıtları baskılayarak ruh hali üzerinde olumlu etki gösterir. Ayrıca, bazı Lactobacillus suşları (L. rhamnosus, L. casei) sıçan modellerinde anksiyete ile ilişkili davranışları ve duygusal düzenlemeyi modüle eder (Lee, Lee ve Hur, 2022).

Probiyotik takviyelerinde genellikle $10^{\square}$–10^{11} CFU/g aralığında dozlar kullanılmakla birlikte, optimal miktar kullanılan suşa ve hedeflenen etkiye göre farklılık göstermektedir. Bu nedenle standart bir doz önerisi henüz net olarak tanımlanmamıştır (Zang ve ark., 2023). Prebiyotik takviyeleri, özellikle fruktooligosakkaritler (FOS), bağırsak mikrobiyotasını modüle ederek *Bifidobacterium spp.* düzeylerini artırmakta ve genellikle iyi tolere edilmektedir. Bu konuda yapılan meta-analizler, günde 7.5–15 g arasındaki doz kullanımınlarında ve 4 haftadan uzun süreli kullanımlarda bu etkinin en belirgin şekilde görüldüğünü göstermektedir (Dou ve ark., 2022). Probiyotik ve prebiyotiklerin sağlıklı yetişkinlerin kullanımında ve optimal doz aralığında kullanımında belirgin ve ciddi yan etkiler gözlenmediği görülmüştür. En sık bildirilen yan etkiler hafif düzeyde gastointestinal sistemle ilişkilidir (gaz, gevşek dışkı, diyare, şişkinlik vb.). Diğer yan etkiler ise nadiren baş ağrısı, uykuya dalma veya sürdürmede zorluk, boğaz ağrısı ve kas ağrısı olarak bildirilmiştir. Probiyotik ve prebiyotikler genellikle güvenli kabul edilse de, hassas popülasyonlarda nadir fakat ciddi riskler göz önünde bulundurulmalıdır (Ryan ve ark., 2021).

Extended Abstract

Global communication is a topic that deserves attention in the field of arts management, in terms of public image and interaction. It is stated that it is easier for most people to communicate in their native language, that they express themselves better, that they understand the other party more clearly, and that they can establish an emotional bond with the other party more easily (CSA Research, 2020; LangWit, 2018; Vacalares, 2023; RWS, 2023). To bring art to a wider audience, both translation and the appropriate and systematic implementation of this translation are crucial points. This study explains building a translation policy for the successful operation of the translation process in arts management and the positive impact this policy can have on institutions' recognition and prestige. It argues that establishing order in the translation process will strengthen communication, enabling a wider audience to be reached. While there are not many academic studies on the role of translation in arts management, existing studies have focused on specific cases. Research examining the field of arts management from the perspective of translation studies covers a wide range of topics, addressing issues such as appropriate translation theories, compliance with quality standards, the form of translated material, strategy changes depending on the translated material, and the use of different theories based on culture or user needs (Manfredi & Bartolini, 2023). Studies examining translation from the perspective of arts management explore a different spectrum, addressing issues such as the translator's working conditions as a third party, the budget allocated for translation in institutions, and the placement of translated texts in institutions such as museums (Ghazi, 2022; Kim, 2020). This study aims to provide a comprehensive perspective by giving a two-way perspective into the topic. The materials undergoing the translation process in arts management are categorized according to the difference between translation and interpreting. It is emphasized that the translation process itself changes depending on the characteristics of these materials. The status of the translator as an artist in literary translation is discussed. The positive impact of incorporating translation theories into translation policies is argued via case studies. It is suggested that applying certain translation strategies will hinder miscommunication, help the audience form connections with the art presented, and allow organizations to express their values regarding what is presented to an international audience. It is outlined how Turkey's multilingual and multicultural structure should be addressed in translation policy. There are nearly 35 languages that are often used in communication in Turkey and considering the variance in audience while building a policy is important to achieve a wider audience and strong communication. The

concepts of accessibility, customization, and diversity are correlated to the translation process, and potential improvements within these frameworks are discussed. The language barrier is suggested as an accessibility issue and a well-planned translation and interpretation policy is suggested as solution. Trending in customization in user experience is also correlated with translation process, and it is suggested that providing translation is included in customization. The importance of institutions' presence in online media for international recognition is emphasized while underlining the importance of implementing the translation policy in online media as well. The websites of various world-renowned museums were examined in terms of language access, and the services they offer in terms of translation were discussed. Population density, globality, geographical proximity and touristic purposes have been prioritized in the language selection of most museums. It is suggested that there are numerous other criteria that can be included in this decision. The language services offered on the websites of some renowned museums in Turkey were also comparatively criticized. The steps to be taken when building a written translation policy, the concepts to be considered, and the current situation are brought together to discuss the place of translation in arts management from a broad perspective and to reveal the positive impact of this policy on international recognition.

Conflict of Interest

"The authors have declared that there is no conflict of interest".

Author Contributions

It has a single author.

Contributions of the authors to the study can be explained.

The advantages of using smoothed ranks in Spearman's correlation are manifold. First, they provide a more nuanced understanding of the relationship between variables, particularly in the presence of noisy or tied data. Second, the approach is more robust to outliers and non-linear relationships. Third, it allows for a more flexible interpretation of ranks, accommodating the specific characteristics and distributions of the data. The proposed method can yield more accurate and meaningful insights into the underlying monotonic relationships, especially in complex data sets where traditional methods might not work the best. Finally, one of the future research objectives would be implementation of adaptive score functions that would address non-monotone associations when Spearman's correlation might not be an ideal method.

Acknowledgment

I would like to thank Prof. Dr. Mehmet Çakmakçı for his academic support and guidance throughout the execution and direction of this study. I am also grateful to the officials of the manufacturing company for facilitating field observations and data access.

Conflict of Interest

The authors declare that there is no conflict of interest regarding this study.

Author Contributions

Gizem Şara Onay:

Conceptual framework of the study, data collection, execution of analyses, development of the artificial neural network model, ERP integration, and manuscript writing.

Mehmet Çakmakçı:

Academic supervision, methodological guidance, evaluation of the modeling process, interpretation of results, and revision of the manuscript.

Acknowledgment

We extend our gratitude to all the experimenters who contributed to this research. We also acknowledge the Gaziantep University, School of Medicine, Research Center, Gaziantep, Turkey, for providing the necessary facilities to carry out this study.

Conflict of Interest

The authors have disclosed that they have no competing interests.

Author Contributions

ZC: Conceptualization, Project administration, Resources, Visualization, Data curation, Formal Analysis, Software, Resources, Writing – original draft, Writing.

göstermektedir. Gelecek çalışmaların, çerçeveleme etkisinin kültürel bağlamlara, dijital karar ortamlarına ve uzun dönemli davranış sonuçlarına etkisini daha ayrıntılı biçimde incelemesi, davranışsal iktisadın açıklayıcı gücünü daha da artıracaktır. Bu yönüyle çerçeveleme etkisi, yalnızca iktisadi kararların değil, modern toplumlarda bireylerin anlamlandırma ve tercih üretme biçimlerinin de merkezinde yer alan temel bir analitik kavram olarak önemini korumaktadır.
