Ek-1 ATC Flight Plan Codes

FPL = Filed Flight Plan
JEP123 = airline 3 letter identifier and flight number callsign for flight
IS = will be rules of flight and type of flight I = IFR S = scheduled
B763/H = type of aircraft and wake turbulence category – boeing 767-300 with heavy wake turbulence
-BDFGHILORVWY/SB1 = equipment loaded on aircraft along with surveillance and pbn equipment
VVNB = departure aerodrome ie departure airfield
2040 = time of departure
The next block is the routing of the flight
When N0455F370 is used it is stating the initial cruise speed and altitude in this case a speed of 455knots and flight level 370 or 37000ft.
If you see K0843S1130 it is the same only metric rules apply. 843 kmh at an altitude of 11300 meters
NOTE: that Jeppesen only displays the metric system for Chinese airspace, everywhere else is standard imperial system of knots and feet
RKSI = arrival airport
0346 = total estimated elapsed time to arrive at arrival airport
RKSS = alternate airfield
PBN/A1B1C1D1L1O1S1S2 = performance based navigation equipment
DOF = date of flight indicated as YYMMDD
REG = registration of aircraft
EET = Estimated elapse time of a fir boundary crossing
SEL= SELCAL set in aircraft database for the code designated by ATS authority
OPR = operator set in the aircraft database
RMK = Remarks can be set in the Flight brief database or modified when filing
E/ = fuel endurance on board
Beyond this is set in the aircraft database
P/ = passengers TBN is to be notified NOTE: TBD is not accepted TBN is the only approved use
R/ = Radio frequency
U if frequency 243.0 MHz (UHF) is available,
V if frequency 121.5 MHz (VHF) is available,
E if emergency locator transmitter (ELT) is available.
S/ = survival equipment
P = polar
D = desert

M = maritime
J = jungle
J/ = life jacket type
L = lighted
F = fluorescent
U = uhf
V = vhf
D/ = dinghies on board followed by how many souls fit on them and their color type
A/ = aircraft color
